

Abdul Malik Muzakir

Back-end & Mobile Developer

I am a software engineer with almost one year and a half of experience, specializing in back-end and mobile development using technologies such as NestJS and Laravel. I am also skilled in front-end development with frameworks like Vue.js and Next.js, and I have experience building mobile applications using Flutter

Programming is not just a profession for me—it's a passion. I am a quick learner who adheres to best practices, consistently delivering high-quality solutions efficiently and on time.

By HackerRank
- JavaScript Basic (HackerRank)
By HackerRank
- Python Basic (HackerRank)
By HackerRank
- CSS Basic (HackerRank)
By HackerRank
- Problem Solving Basic (HackerRank)
By HackerRank

Competition

- 3rd place in Bandung Regency Competency Competition (April 2023)
By Web Technologies

Experience

Professional

○ 2023 June - 2025 June

Back-end Developer

PT. Four Vision Media • Contract

Bandung, West Java, Indonesia

- Strong communication skills with excellent verbal and written abilities, enabling effective collaboration within teams and clear interaction with clients and stakeholders. Proven adaptability in managing changing project requirements and solving complex technical challenges with a customer-centric approach, ensuring user needs are prioritized in product design and development.
- Experienced in cross-functional team collaboration and leadership, with the ability to motivate teams, facilitate discussions, and guide strategic planning. Innovative thinker skilled in devising creative solutions to problems using cutting-edge technologies and data-driven methodologies.
- Gained direct industry experience, fostering a deep understanding of work processes, best practices, and professional ethics. Actively contributed to the development of an employee attendance application, involved in all phases from planning to testing.

○ 2023 July - 2023 September

Back-end Developer

PT. Basic Technology • Freelance

Bandung, West Java, Indonesia

- Led a team in developing a tax payment application, ensuring seamless feature integration and functionality. Collaborated with stakeholders to gather requirements, aligning project objectives and delivering solutions that met business goals.
- Oversaw the implementation of a secure payment gateway using the third-party provider Midtrans. Worked closely with backend developers to ensure the payment functionality was integrated smoothly into the application's user interface, enabling efficient transaction processing.
- Designed and implemented a robust database system, optimizing data storage, retrieval, and manipulation. Conducted extensive pre-project research on architecture and database design, creating blueprints and data models that ensured the application's scalability, maintainability, and performance.

○ 2022 April - 2023 June

Back-end Developer

PT. SINOVATIF • On-site

Bandung, West Java, Indonesia

- Acquired valuable hands-on experience in an industrial setting, gaining a strong understanding of work processes, industry standards, and best practices relevant to the field.
- Engaged in active learning within the workplace, developing essential skills and a deep understanding of professional responsibilities, ethics, and the demands required for success in a professional environment.
- Contributed to the development of an employee attendance application, participating in all stages of the project, including requirement gathering, planning, design, coding, and testing, ensuring the successful implementation of key features.
